

## **CPA ( Certified Public Accountant)**

### **Over View**

The CPA certification program charts the pathway to becoming an international certified public accountant. It incorporates the best of existing legacy programs and reflects what business, public practice and government require from professional accountants.

### **The CPA Certification Program Will:**

- Appeal to employers for its ability to develop accountancy and business skills in a professional program that combines high quality and cost effectiveness
- Ensure that all CPAs have the strong foundation of knowledge and skill to succeed in whatever role or position they take on
- Provide an option to be trained as an auditor at the point of qualification
- A graduate-level CPA Professional Education Program

### **Content specifications content of CPA**

- Auditing procedures, standards and practical application
- Business concepts, analysis and application
- Accounting principles for business, not-for-profit organizations, and public sector
- Regulation including taxation, ethics, and business law

### **International Institute:**

Association of international Certified Professional Accountants (AICPA)
